

SINGLE CUT

Envelope Opener

AN EXTRA
HEAVY DUTY
ENVELOPE
OPENING
MACHINE

The Single Cut is an Extra Heavy Duty envelope opening machine for large volume envelope processing operations.

The Single Cut is well suited for handling large envelopes including flats and thick envelopes.

 *Ultra Systems*
A Division of INSCERCO MFG., INC.

Benefits

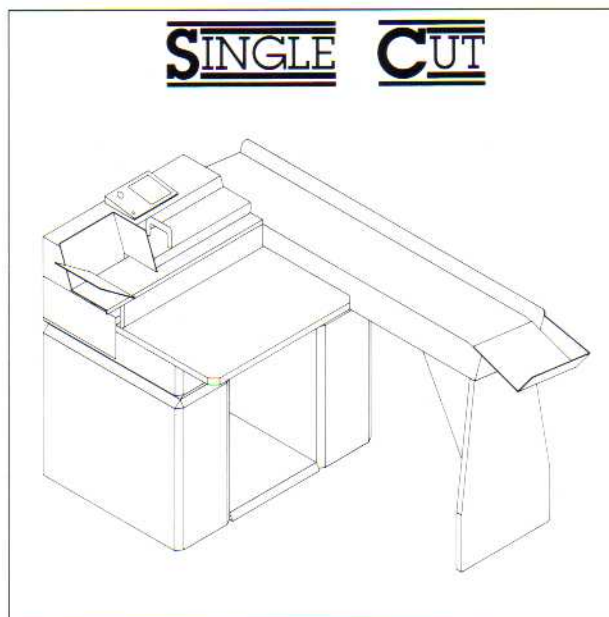

- Variable Speed
- Flip up table for flats
(specifically designed for flats)
- Unique envelope opening system
- Feathered edge
- Minimizes document damage
- Variable cutting range of envelope 0-1/8"
- Designed for office environment as well as mail room
- Batch counting standard
- Ability to count envelopes only

Among the key features available in the Single Cut are:

- Heavy, rugged construction
- Top quality ball bearing motors
- Single motor drive system for longer life
- Large capacity wide-belt conveyor-stacker
- 100% use of ball bearings on all shafts
- Quiet operation
- Minimal service and maintenance requirements

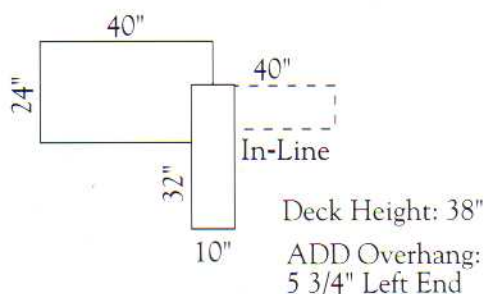

OPERATION OF THE SINGLE CUT

Normal Usage. When opening one envelope edge (top or bottom), place unopened envelopes in the feed hopper so that the edges to be cut are against the back of the hopper and the leading edges of the envelopes are against the right face of the hopper.

SPECIFICATIONS

- Weight:** 160 lbs
(Conveyor 55 lbs)
- Power:** 110/120 V, 60Hz 220 V, 50/60 Hz
Machine: 8 Amps 8 Amps
- Speed:** 7-inch envelopes at 600 per minute.
Shorter envelopes faster.
Longer envelopes slower.
- Envelopes Sizes and Types:**
Opens all sizes and types (sizes and types may be mixed.)
- Envelope thickness:**
Automatic feed to about 3/16 inch.
- Feed Hopper Capacity:**
Approximately 300 Remittance type.

Quality and Innovation . . . The Right Combination
