Freehand Address Printer

The FREEHAND Address Printer

As envelope printing becomes a larger part of your office's work load, you find that the laser printer just isn't made to do envelopes, at least not at the volume you're asking for. There's increasing opportunity to create simple direct mail pieces and use them to solicit new customers, but the technology in the office just doesn't support the effort, and your volume isn't interesting to the local mail shop.

Use the FREEHAND address printer to solve the problem. This machine is a heavy duty address printer scaled down for the office. It's easy to use and sets up with a PC software program that gives tremendous flexibility. You'll print all sorts of envelopes, flyers, newsletters and post cards with this machine and it just asks for more. Mailing stops being a pain and becomes an opportunity with the FREEHAND printer.

Freehand Address Printer

- addresses envelopes, postcards & self-mailers
